TOOL: Campus AI / AGENT: ARIA

Campus AI

ARIA: Academic Real-time Intelligent Assistant

Portals · **Emails** · **Calendars** · **Conversations**

1 Collect — Gathers data from portals, emails, calendars and conversations.

2 Understand — Reads each item to find tasks, deadlines and requests.

3 Route — Sends each item to the right agent.

4 · Student Agent

For students

- Pending subjects and academic tasks
- Class timetable and reminders
- Assignment and exam deadlines
- Attendance and grade updates
- Campus notices and events

4 · Professor Agent

For professors

- Class schedule and room changes
- Submissions awaiting grading
- Student queries and requests
- Attendance and performance insights
- Department notices and meetings

5 Deliver — Sends timely updates to students and professors.

Feedback and human review keep the model improving
